Create

Pricing Plans are at the bottom.

The number of “Workspaces” is how many machine learning models your students can have (at once) for their text projects.

If you have 10 students, and you want them to all be able to train their own text projects at the same time, then you will need 10 workspaces.

With the Lite plan, an instance of Assistant will let you have 5 workspaces.

Using the ML model from Scratch projects is Free in the Lite Plan (up to 10,000 times per month)

Upgrade to a Pay-As-You-Go account and receive a \$200 credit.

Upgrade

The “Standard” plan lets you have up to 20 workspaces.

Each one will support up to 20 students training machine learning models for their text projects at once.

Or... 10 students each training machine learning models for two of their text projects.

Using the ML model from Scratch projects costs £0.001617 in the Standard Plan every time you use the model to recognise some text.

This plan is not available with your current account type.  
Upgrade to a Pay-As-You-Go account and receive a \$200 credit.

Upgrade

1. Create your IBM Cloud account
2. Create credentials for text projects
3. Create credentials for images projects
4. Billing

Pricing Plans are at the bottom.

With the “Standard” plan, creating a machine learning model for an images project will cost £0.0647 per image used to train the model.

So, if you train a model using 40 images, that will cost £2.588

Using the ML model from Scratch projects costs £0.00121 in the Standard Plan every time you use the model to recognise an image.

Getting started tutorial

Last Updated: 2018-11-15 | [Edit in GitHub](#)

This tutorial guides you through how to use some built-in models in IBM Watson™ Visual Recognition to classify an image and then detect faces in an image.

Before you begin

- Create an instance of the service:
  - ① Go to the [Visual Recognition](#) page in the IBM Cloud Catalog.
  - ② Sign up for a free IBM Cloud account or log in.
  - ③ Click **Create**.
- Copy the credentials to authenticate to your service instance:
  - ① Click **Show** to view your credentials.
  - ② Copy the apikey value.

Step 1: Classify an image

① Issue the following call to classify an image. Replace `apikey` with the service credentials you copied.

1. Create your IBM Cloud account

2. Create credentials for text projects

3. Create credentials for images projects

4. Billing

This is the confirmation screen once you've created your Watson Visual Recognition instance.

Click the "Service Credentials" link on the left side menu.

The Dashboard shows the services that you've created.

## For **text** projects, you'll need to create **Watson Assistant** instances

Pricing Plan	How many of these can you create WITHOUT adding a credit card to your account?	How many of these can you create if you add a credit card to your account?	Cost when students click on "Train a new machine learning model"	How many machine learning models can your students have at once?	How much it costs to recognise text from Scratch each time	How many times can students recognise text from Scratch?
Lite	3	No limit	free	5	free	10,000 per month
Standard	0	No limit	free	20	£0.001617	unlimited

## For **images** projects, you'll need to create **Watson Visual Recognition** instances

Pricing Plan	How many of these can you create WITHOUT adding a credit card to your account?	How many of these can you create if you add a credit card to your account?	Cost when students click on "Train a new machine learning model"	How many machine learning models can your students have at once?	How much it costs to recognise an image from Scratch each time	How many times can students recognise images from Scratch?
Lite	1	1	free	2	free	1000 per day
Standard	0	No limit	£0.0647 per training image	unlimited	£0.00121	unlimited

To recap, the prices...

1.  
Create your IBM Cloud account

2.  
Create credentials for text projects

3.  
Create credentials for images projects

4.  
Billing

These prices are correct at the time of writing, and are provided as an indicative guide. For the definitive prices, refer to the prices shown in the IBM Cloud catalog.

Prices here quoted for the UK.

The IBM Cloud catalog will show prices in other currencies for users not in the UK.

## Imagine...

You have a class of **30 children**

They share computers (two children to every computer) so you will have 15 computers and 15 student accounts logged in to machinelearningforkids.co.uk

You choose a project worksheet for the class that involves recognising **text**

An example of IBM Cloud costs for a single Machine Learning for Kids class

Example 1:  
A large class working on a text project

## You could...

You create **three (3) x Lite Plan** instances of the Watson Assistant service

This will allow all fifteen pairs to train machine learning models  
(each Lite Plan allows up to 5 machine learning models)

## That means...

There is **no charge** for Lite Plan services.

1.  
Create your IBM Cloud account

2.  
Create credentials for text projects

3.  
Create credentials for images projects

4.  
Billing

These prices are correct at the time of writing, and are provided as an indicative guide. For the definitive prices, refer to the prices shown in the IBM Cloud catalog.

## Imagine...

You have a class of **30 children**

You will have 30 computers and 30 student accounts logged in to [machinelearningforkids.co.uk](http://machinelearningforkids.co.uk)

You choose a project worksheet for the class that involves recognising **images**

An example of IBM Cloud costs for a single Machine Learning for Kids class

## You could...

You create **one Lite Plan** instance of the Watson Visual Recognition service

You create a “whole class project” for your class, so all your students work together to contribute to the training of a single machine learning model.

They all collect their training data at the same time. You as the teacher will be the one who clicks the “Train new machine learning model” button. They can all use the machine learning model from Scratch at the same time.

## That means...

There is **no charge** for Lite Plan services.

1.  
Create your IBM Cloud account

2.  
Create credentials for text projects

3.  
Create credentials for images projects

4.  
Billing

These prices are correct at the time of writing, and are provided as an indicative guide. For the definitive prices, refer to the prices shown in the IBM Cloud catalog.

## Imagine...

You have a coding club of **6 children**

They share computers (two children to every computer) so you will have 3 computers and 3 student accounts logged in to machinelearningforkids.co.uk

You choose a project worksheet for the class that involves recognising **images**

An example of IBM Cloud costs for a single Machine Learning for Kids class

## You could...

You create **one Lite Plan** instance of the Watson Visual Recognition service

You ask your students to **take turns** to train machine learning models each using 30 example images.

They all collect their training data at the same time, but they need to wait to click the “Train new machine learning model” button one at a time

## That means...

There is **no charge** for Lite Plan services.

1.  
Create your IBM Cloud account

2.  
Create credentials for text projects

3.  
Create credentials for images projects

4.  
Billing

These prices are correct at the time of writing, and are provided as an indicative guide. For the definitive prices, refer to the prices shown in the IBM Cloud catalog.

## Imagine...

You have a coding club of **6 children**

They share computers (two children to every computer) so you will have 3 computers and 3 student accounts logged in to machinelearningforkids.co.uk

You choose a project worksheet for the class that involves recognising **images**

An example of IBM Cloud costs for a single Machine Learning for Kids class

## You could...

You create **one Lite Plan** instance and **one Standard Plan** instance of the Watson Visual Recognition service

You ask your students to train machine learning models each using 30 example images.

You let them each test their machine learning models 10 times.

## That means...

The first two models will be created using the Lite Plan. There is no charge for Lite Plan services

The third model will use the Standard Plan.

Training their machine learning models will cost approx £1.94 (1 students x 30 images x £0.0647 cost)

Testing their machine learning models will cost approx £0.02 (1 students x 10 images x £0.001617 cost)

Class cost could cost approx £1.96

An example of IBM Cloud costs for a single Machine Learning for Kids class

## Example 4:

A small code club working on an images project

These prices are correct at the time of writing, and are provided as an indicative guide. For the definitive prices, refer to the prices shown in the IBM Cloud catalog.

1.  
Create your IBM Cloud account

2.  
Create credentials for text projects

3.  
Create credentials for images projects

### Feature (Promo) Codes

Formerly known as promo codes, feature codes unlock additional IBM Cloud capabilities including subscriptions, credit, and account extensions. One

If you want to create more than one Watson service of the same type, you will need to provide a credit card.

The “Usage Dashboard” and “Spending Notifications” pages here will let you keep track of your costs.
