

AI technology in *Machine Learning for Kids* is provided by Watson services in IBM Cloud.

This means you need to create an IBM Cloud account and create some Watson services to add to your *Machine Learning for Kids* class.

Creating an IBM Cloud account is free.

Creating “**Lite Plan**” Watson services is **free**, but have restrictions on the number of machine learning models you can create with them.

Creating “**Standard Plan**” Watson services increases these restrictions.

If you work for a school, you can request a “**Promo Code**” that lets you **create Standard Plan services for free**.

If you don’t work for a school, you can sign up for \$200 credit and pay per use after that.

This document gives you step-by-step instructions for how to do all of this.

1.
Create your IBM Cloud account

2.
Create credentials for text projects

3.
Create credentials for images projects

4.

Find “Watson Assistant” in the list.

The filter at the top is a good way to help you do that.

Click on “Watson Assistant”

The screenshot shows the IBM Cloud Catalog interface. At the top, there's a navigation bar with links for Chrome, File, Edit, View, History, Bookmarks, People, Window, Help, and a system status bar showing Fri 19 Apr 23:16. Below the navigation is a header with the title "Watson Assistant - IBM Cloud" and a search bar labeled "Search resources and offerings...". The main content area displays the "Watson Assistant" service details, including its icon (two speech bubbles), name, provider (Lite • IBM), and a brief description: "Watson Assistant lets you build conversational interfaces into any application, device, or channel." Below this are links for "View Docs", "View API Docs", and "Terms". On the left, there's a sidebar with author information: AUTHOR (IBM), PUBLISHED (18/04/2019), and TYPE (Service). The main form for creating a new service instance is visible, with fields for "Service name" (containing "Put Any Name In Here"), "Choose a region/location to deploy in" (set to London), "Select a resource group" (set to Default), and "Tags" (with an example of "env:dev, version-1"). A "Pricing Plans" section follows, with tabs for PLAN, FEATURES, and PRICING, and buttons for "Add to estimate" and "Create". A "Need Help?" link is at the bottom.

Enter in details for the Assistant service that you will create

“Service name” is a name to help you remember what you will use this for.

The name doesn't really matter.

The region/location that you choose doesn't really matter.

Scroll down to see the rest of the options before you click the Create button!

Pricing Plans are at the bottom.

The number of "Dialog Skills" is how many machine learning models your students can have (at once) for their text projects.

If you have 10 students, and you want them to all be able to train their own text projects at the same time, then you will need 10 dialog skills.

With the Lite plan, an instance of Assistant will let you have 5 dialog skills.

Using the ML model from Scratch projects is Free in the Lite Plan (up to 10,000 times per month)

FEEDBACK

The “Standard” plan lets you have up to 20 dialog skills.

Each instance of the Standard Plan service will support up to 20 students training machine learning models for their text projects at once.

Or... 10 students each training machine learning models for two of their text projects at once.

Or... 5 students each training machine learning models for four of their text projects at once.

Using the ML model from Scratch projects costs £0.001617 in the Standard Plan every time you use the model to recognise some text.

Billing

Pricing Plans are at the bottom.

With the “Standard” plan, creating a machine learning model for an images project will cost £0.0647 per image used to train the model.

So, if you train a model using 40 images, that will cost £2.588

Using the ML model from Scratch projects costs £0.00121 in the Standard Plan every time you use the model to recognise an image.

Curl Go Java Node More

Getting started tutorial

Last Updated: 2019-03-19

This tutorial guides you through how to use some built-in models in IBM Watson™ Visual Recognition to classify an image and then detect faces in an image.

Tip: If you prefer to work in a graphical interface, use Watson Studio. [Launch the tool](#) and follow the [video](#).

Before you begin

- Make sure that you have the `curl` command.
 - Test whether `curl` is installed. Run the following command on the command line. If the output lists the `curl` version with SSL support, you are set for the tutorial.

1. Create your IBM Cloud account
2. Create credentials for text projects
3. Create credentials for images projects
4. Billing

This is the confirmation screen once you've created your Watson Visual Recognition instance.

Click the "Service Credentials" link on the left side menu.

Prices here quoted for the UK.

The IBM Cloud catalog will show prices in other currencies for users not in the UK.

Imagine...

You have a class of **30 children**

They share computers (two children to every computer) so you will have 15 computers and 15 student accounts logged in to machinelearningforkids.co.uk

You choose a project worksheet for the class that involves recognising **text**

An example of IBM Cloud costs for a single Machine Learning for Kids class

Example 1:
A large class working on a text project

You could...

You create **three (3) x Lite Plan** instances of the Watson Assistant service

This will allow all fifteen pairs to train machine learning models
(each Lite Plan allows up to 5 machine learning models)

That means...

There is **no charge** for Lite Plan services.

You will have 30 computers and 30 student accounts logged in to machinelearningforkids.co.uk

You choose a project worksheet for the class that involves recognising **images**

An example of IBM Cloud costs for a single Machine Learning for Kids class

You could...

You create **one Lite Plan** instance of the Watson Visual Recognition service

You create a “whole class project” for your class, so all your students work together to contribute to the training of a single machine learning model.

They all collect their training data at the same time. You as the teacher will be the one who clicks the “Train new machine learning model” button. They can all use the machine learning model from Scratch at the same time.

That means...

There is **no charge** for Lite Plan services.

Feature Codes

Feature codes add subscription credit that you purchased or unlock additional IBM Cloud capabilities for your account. Each feature code can be applied only once.

Apply code

EU Supported: Off

If you select the EU Supported option, the most common support issues will be limited to an IBM Cloud team located in the European Union.

On Learn more

HIPAA Supported: Off

The US Health Insurance Portability and Accountability Act (HIPAA) requires that you enter into a contract to ensure safeguarding of protected health information (PHI).

If you or your company is a covered entity as defined by HIPAA, turn on this setting

EU S If you s limited On

Feature Codes Feature codes add subscription credit that you purchased or unlock additional IBM Cloud capabilities.

Feature code
Enter a feature code to add subscription credit or extra capabilities to this account.
You can apply a feature code to only one IBM Cloud account, and the code cannot be removed after it's applied.

Feature code Enter code
The feature code will be applied to the account:
Teacher Demo's Account Cancel Apply

HIPAA Supported: Off
The US Health Insurance Portability and Accountability Act (HIPAA) requires that you enter into a contract to ensure safeguarding of protected health information (PHI).
If you or your company is a covered entity as defined by HIPAA, turn on this setting

1. Create your IBM Cloud account
2. Create credentials for text projects
3. Create credentials for images projects
4. Billing

Once you have the Promo Code, go back to <https://cloud.ibm.com>

Click on **Manage -> Account**

Click on **Account settings**

Scroll to **Feature Codes** and click on **Apply code**

Enter your promo code

The promo code will identify you as being from an academic institution. This indicator will prevent charges for your usage of IBM Cloud.

You only need to do this once (per year) for your account.

Upgrade to Pay-As-You-Go

Add your credit card and unlock access to the full catalog.

There's no minimum charge and you'll only pay for what you use. Keep all your current free capabilities and get a whole lot more:

- Continued access to Lite plans
- Additional free Cloud Foundry memory to 512 MB
- Access to all free plans in the catalog
- Ability to purchase infrastructure resources

Get started with a \$200 credit!
